

Psience OÜ's client DPA is an international company specializing in wide variety of solution development and implementation for large entities based on Microsoft, IBM and Oracle technologies. DPA Nordic is the Estonian subsidiary of DPA. For more information, please, visit us: www.dpanordic.eu

We believe that:

- There's no luck involved in succeeded projects – it's a team work with clear targets;
- The only way to do good job is to be your solutions biggest fan;
- Obstacles are a challenge, not an excuse.

As we are growing, we are welcoming the following to join our friendly team:

Junior IT Infrastructure Solutions Consultant

Your duties will include:

- To take part in project realization of implementation and maintenance of IT infrastructure – to check on configurations, installations, compliance testing, to provide clients with training and consultations
- To take part in software asset management (SAM) project realization – to perform inventory of deployed software and relevant documentation
- To take part in writing project documentation
- To conduct research of new products, innovations, technologies and solutions, to evaluate their applicability and to learn using them

We will appreciate if you have:

- University degree, preferably in IT
- Understanding about basic principles of how computer networks work (TCP/IP, DNS, DHCP)
- Knowledge about maintenance, deployment and administration of Microsoft Windows work stations and servers
- Good command of Estonian, English (preferably also Russian)
- Experience with Microsoft corporate solutions (like Active Directory, Exchange, Lync, SharePoint, System Center product group)
- Knowledge about network devices and principles how firewalls work (configuration, deployment, administration)
- Understanding about IT management processes – incident management, rights management, security
- Analytical mind-set and result orientation
- Excellent communication skills

We will be happy to provide you with:

- Motivation system which is directly related to your work performance and results;
- Personal and career advancement opportunities in becoming an IT expert of MS technologies;
- All the necessary training and certification;
- Social guarantees;
- The kind of benefits that come from working with some of the 100 biggest clients in the Baltic Sea region;
- An open-minded environment and the enjoyment of working for an ambitious subsidiary.

We create possibilities for you to reach new heights!
